

Maximising long-term value with digital sustainability

 slovensko
društvo
informatika

 **INNOPAY**

- 
- The process of applying
 - **social, economic, and environmental** stewardship principles to
 - digital products and services, and data delivered through the internet.

European Data Strategy

”

GPDR gave us rights, but
no means to exercise
those rights.

Margrethe Vestager
Executive Vice President
European Commission
for A Europe Fit for the Digital Age

Europe intends to become a leader

With focus on human centricity

- Technology that works for people
- Protection of consumers and personal data
- Fair competition
- Open, democratic, inclusive and sustainable

By creating a single market for data

- Data can flow seamlessly within the EU and across sectors, for the benefit of all
- European rules are fully respected
- The rules for access and use of data are fair, practical and clear

Upcoming data regulation

Digital Markets Act (DMA)

Applicable 2 May – 24 Aug 2023

Data Act (DA)

Trilogue negotiations ongoing

Digital Services Act (DSA)

Applicable 17 feb 2024

Artificial Intelligence Act (AIA)

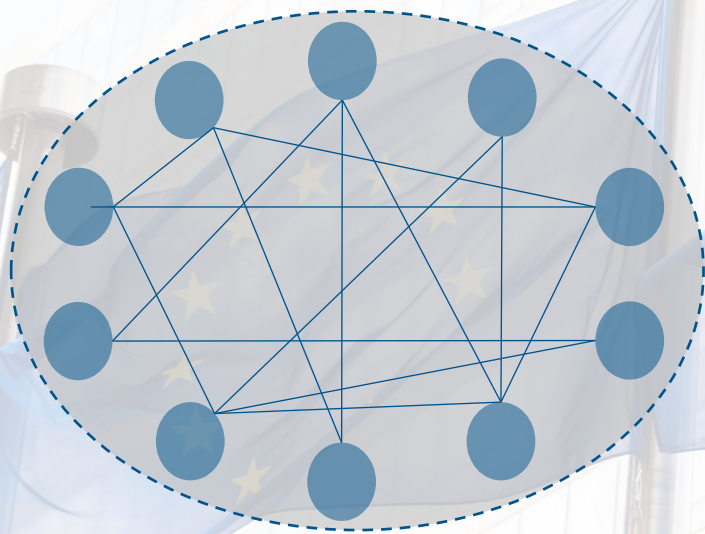

Trilogue expected 2H 2023

Data Governance Act (DGA)

Applicable 24 Sept 2023

Data spaces, enablers of the European data strategy

A federated decentralised data ecosystem within a certain application domain that is based on shared policies and rules.

network of trust

Data sovereignty

Having control over how the data that has been created by you or about you is used

- People
- Organisations
- Things

Closely coupled with your identity, persona or digital twin

For now, let's keep focus on the use case

The shortest message: data sovereignty

1

Take data sovereignty as a guiding principle

2

Establish a soft infrastructure for decentralised data sharing

3

Act now, and keep focus on the use case

The Dutch approach: a few examples
